

Instructions (with pictures) from <https://shockbyte.com/billing/knowledgebase/850/How-to-Connect-to-your-Minecraft-Bedrock-Server-on-Nintendo-Switch.html>

1. Go to the home screen by pressing the house button
2. Navigate to System Settings (the gear icon)
3. Navigate to Internet on the left hand sidebar
4. Click Internet Settings
5. If you are ever prompted for a parental control password in the steps below, the code is 0710
6. Select your currently connected network under Registered Networks, or, if there is no currently connected network, choose the one you want to connect to under Networks Found, and make sure you enter the right password for it! Then, go back to Step 4.
7. Select Change Settings
8. Locate the DNS Settings option and select Manual
9. For the Primary DNS, use: 104.238.130.180
10. For the Secondary DNS, use: 008.008.008.008
11. Click Save
12. Select Connect to This Network

When inside Minecraft, do the following:

1. Click Play from the main menu
2. Go to the Servers tab and select any featured server
3. On the Server List, look for QYA Server. If you find it, select it. If you don't, keep going
4. Click on Connect to a Server
5. Enter in a Server Address of minecraft.jeffo.net
6. Turn on the Add to Server List option
7. Click Submit
